EXAMINER'S AMENDMENT

Allowable Subject Matter

1. Claims 1, 3-13, 15-27 are allowed.

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Arlene Neal on 06/04/2009.

The application has been amended as follows:

- Claim 4 has been re-written as follows:

4. The cartridge case (2) and ammunition round (1) according to Claim 1, wherein the at least one inner or outer coating, surface or layer (12, 13) comprises a material applied by phase transformation, including vaporization or condensation to form an insulating film (12, 13), a dimeric or polymeric raw material comprising hydrocarbons, including poly-parasylylene.

2. The following is an examiner's statement of reasons for allowance: Claim 1 requires an ammunition round and case to include a casing, bottom piece and firing device, the firing device comprising an electrical connection. Claim 1 further requires the casing and bottom piece to have insulating shells, layers or surfaces that electrically insulates the casing and bottom piece from the rest of the round (an ammunition round

is a unit of ammunition consisting of the parts necessary to fire one shot

[http://www.merriam-webster.com/dictionary/round\[3\]](http://www.merriam-webster.com/dictionary/round[3]), which normally includes a fully loaded cartridge containing a projectile, propellant, primer and casing). Therefore, the shells, layers or surfaces must insulate both the casing and bottom piece from the firing device and projectile of the particular round. Claim 1 further requires a case of electrically conductive metal with an inner or outer coating, surface or layer of a dielectric material for electric insulation of the cartridge case in relation to the barrel and other parts of the round. Cited prior art references disclose firearm rounds having all plastic casings or plastic casings with metal liners. These references do not anticipate the limitation requiring a case manufactured from an electrically conductive metal. Other references US 3830157 issued to Donnard et al. and US 5165040 issued to Andersson et al. show metal cartridges with what appears to be electrically insulating liners. However, these liners are not disclosed as insulating the casing as claimed since there are areas or surfaces of the casings that are not covered to offer the insulating properties as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Troy Chambers whose telephone number is 571-272-6874. The examiner can normally be reached on 8 a.m. - 4 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael J. Carone can be reached on 571-272-6873. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
